

We're Looking for established sales partners that serve law enforcement, corrections, and security professionals.

Remote Imaging Technology

IT Concepts, is an OEM of products that utilize remote imaging technology. We've been developing imaging tools like Borescopes, Fiberscopes and Videoscopes since 1990. Our optical, video, electronics and software capabilities have been employed by our customers to produce unique, specialized devices, like **Ultra Sensitive Low-Light Videoscopes** and **Miniature Remote Video Cameras**.

Today, we continue to investigate new relationships, and to learn how we can apply our technology to help develop new products and applications. We believe critical applications for our technology may include:

- **Covert Search and Surveillance**
- **Explosive Ordnance Disposal**
- **Contraband Search**
- **Search and Rescue**
- **Vehicle Inspection**

IT Concepts has the technology resources to create robust and practical solutions for the demanding conditions faced by law enforcement, corrections and security professionals and we'd like to show you how. Contact us to explore business opportunities, and we'll share the experience we've gained through our successful working relationships with other companies.
